

## **Overview of the NG-CDF Bursary Application System**

Below is a brief overview of the NG-CDF Bursary Application System, designed to enhance the bursary application process for National Government Constituency Development Fund (NG-CDF) beneficiaries.

### **Problem & Solution:**

Traditionally, the bursary application process has been cumbersome and prone to delays. This digital system simplifies this process by:

- Allowing applicants to submit basic details without creating accounts.
- Automatically verifying applicants' eligibility using voter registration data.
- Streamlining data management with automated record-keeping in Google Spreadsheets.
- Ensuring transparency by disqualifying applicants whose data doesn't match the applied-for constituency.

### **Benefits:**

The system offers several advantages:

- Simplified application process for parents and students.
- Efficient processing for NG-CDF office staff.
- Enhanced transparency in bursary disbursements.
- Digital storage for easy data retrieval and archival.

I'll be happy to provide further information and answer any questions you may have.

Thank you for showing interest.

Best regards,

Brian Mwangi
